## *In Suspense*

*"My works are conceived as a response to the sensations, feelings and experiences caused by extreme situations. In this series, confinement, death, uncertainty, confinement, fears, the truth, the need to breathe and the feeling of oppression appear. Through them I seek to express all the emotions and events that catch me, move me, mobilize me, what impacts me, what defines me, my sensitivity and expressiveness, the drama that I capture with my way of feeling, my vision of the world that I see and feel. I let myself be carried away in the moment of creation by dropping the barriers of reason. In collages I use the materials that I have, or that I find, that I recycle".*
